

ScriptFax™

Enhanced Pharmacy Fax Database

Data fields contained in the **ScriptFax Enhanced Pharmacy Fax Database**

Product version 3.0. Builder version 8.1.

An archive of records that have been deprecated as a result of testing or other method of verification is preserved in the file PharmacyFax_Deprecated, similar in structure to the ScriptFax primary file.

Field Name	Description	Data Type	Size																								
NPI	Pharmacy Type 2 Record NPI Number; composite key: NPI, Fax, Fax Source, FaxType	Text	10																								
Fax	Fax Number; composite key: NPI, Fax, Fax Source, FaxType	Text	20																								
FaxSource*	Source of the fax number. 2 = organization NPI record, 1 = individual pharmacist NPI record; composite key: NPI, Fax, Fax Source, FaxType, FaxType. FaxSource "2" is the higher priority and should be used first if there are more than one verified fax numbers for a given pharmacy.	Text	1																								
FaxType*	P = organization's store (practice) address fax number, M = pharmacy's business mailing address fax number; composite key: NPI, Fax, Fax Source, FaxType, FaxType. FaxType "P" is the higher priority and should be used first if there are more than one verified fax numbers for a given pharmacy.	Text	1																								
Chain	Y = this is a chain pharmacy record, derived algorithmically**	Text	1																								
OrgName_LBN	Pharmacy's name	Text	70																								
OthOrgName	Other name reported by pharmacy on the NPI record	Text	70																								
CoLoCode™	Derived algorithmically based on pharmacy physical location. Used to link fax numbers reported by pharmacists practicing at the location indicated in the following address lines.**	Text	40																								
StreetAddr1	Street address line 1	Text	55																								
StreetAddr2	Street address line 2	Text	55																								
City	Address city	Text	40																								
State	Address state	Text	40																								
Zip	Address Zip Code	Text	20																								
County	Address county	Text	45																								
Longitude	NEW: Longitude of store location, to 6 decimal places, rooftop accuracy where available	Number	Decimal																								
Latitude	NEW: Latitude of store location, to 6 decimal places, rooftop accuracy where available	Number	Decimal																								
RuralUrbanSub	R = Rural, U = Urban, S = Suburban/other	Text	1																								
Wealth	Wealth level of location zip code (percent of Federal Poverty Level).	Text	2																								
<table><tr><th>FPL Segment</th><th>Wealth Level</th></tr><tr><td>=<50% FPL</td><td>1</td></tr><tr><td>50% to 100% FPL</td><td>2</td></tr><tr><td>100% to 150% FPL</td><td>3</td></tr><tr><td>150% to 200% FPL</td><td>4</td></tr><tr><td>200% to 300% FPL</td><td>5</td></tr><tr><td>300% to 500% FPL</td><td>6</td></tr><tr><td>500% to 700% FPL</td><td>7</td></tr><tr><td>700% to 1000% FPL</td><td>8</td></tr><tr><td>1000% to 1500% FPL</td><td>9</td></tr><tr><td>1500% to 2000% FPL</td><td>10</td></tr><tr><td>2000% to 3000% FPL</td><td>11</td></tr></table>				FPL Segment	Wealth Level	=<50% FPL	1	50% to 100% FPL	2	100% to 150% FPL	3	150% to 200% FPL	4	200% to 300% FPL	5	300% to 500% FPL	6	500% to 700% FPL	7	700% to 1000% FPL	8	1000% to 1500% FPL	9	1500% to 2000% FPL	10	2000% to 3000% FPL	11

2000% to 3000% FPL	11																										

MSA	Metropolitan statistical area of pharmacy location	Text	10
Pharmacists	Count of pharmacists reporting practicing at this location, derived algorithmically (Beta; may not appear in all releases until further notice.)	Number	Long Int
LocationPhone	Number reported as the phone for the location on the pharmacy's Type 2 NPI record (untested)	Text	20
MailPhone	Number reported as the phone for the business mailing address on the pharmacy's Type 2 NPI record (untested)	Text	20
PrimaryTaxo	Primary pharmacy specialty/facility type code from pharmacy's NPI record. If primary is not identified, first-listed code is used. Full pharmacy type coding can be found in the CPAC dataset .	Text	50
TaxoDescr	Pharmacy specialty/facility type description.	Text	255
IsOrgSubpart	Y = this is a record for a subpart of a wider organization.	Text	1
License	License number where reported	Text	20
LicenseState	Licensing state where reported	Text	2
PN	Name Prefix (Dr, Ms, etc.) of reported contact for pharmacy business entity	Text	5
FN	First name of authorized official for pharmacy business entity	Text	20
MN	Middle name of reported contact for pharmacy business entity	Text	20
LN	Last name of authorized official for pharmacy business entity	Text	35
SN	Name Suffix (Jr, II, etc.) of reported contact for pharmacy business entity	Text	5
Cred	Credential(s) of reported contact for pharmacy business entity	Text	20
Title	Title of reported contact for pharmacy business entity	Text	100
ContactPhone	Phone number of reported contact for pharmacy entity	Text	100
EnumDate	Date pharmacy registered this NPI record in the federal NPI database	Text	10
UpdateDate	Date pharmacy most recently updated this NPI record	Text	10
DateUpdateAdded	Date/Time the record was updated with current information. Older date implies data carried forward from a previous release that may have been changed since. Included for reference.	General Date	
Grade	Current grade of this number, A through F; U = Ungraded. D and F grades indicate that the particular number reported by the provider does not reach a fax machine after multiple tries. A through C indicate successful fax transmission, with A and B used by prescription transmission companies to indicate status of the transmission. If a fax number has multiple entries with differing grades, C is recommended for administrative and other uses not involving transmission of a prescription. HIPAA privacy restrictions apply to fax transmission of prescriptions; refer to the HIPAA regulations for details.	Text	1
GradeDate	Date this record was graded A through D.	General Date and time (m/d/yyyy 00:00)	
GradeSource	PartnerID of grade source or append source. Does not reveal partner information; this identifier is a random numerical code assigned internally, known only to CarePrecise EPFD project personnel. (Internal use by CarePrecise verification partners.)	Text	6
DateDeprecated	If a record (fax number/location) has been proven to be a non-working delivery point, the date this fax record was removed from service is recorded here. Deprecated records are archived to the PharmacyFax_Deprecated file, and remain available for inspection.	Short Date (m/d/yyyy)	
MustCall	Pharmacy requires telephone call from prescriber for faxed prescriptions. Provided for customer use; not populated by CarePrecise.	Boolean	
MailPharmacy	This fax number is for the prescription-by-mail service and may not suffice for local pickup. Provided for customer use; not populated by CarePrecise.	Boolean	
AcceptsFaxForNewRx	Proven or advertised: This pharmacy accepts fax for new prescriptions. Provided for customer use; not populated by CarePrecise.	Boolean	
MultiLocationsPerFax	Appears to be reported for multiple locations, which indicates that this is not a viable fax number for prescription delivery.	Boolean	
BestFax*	"Y" in this field indicates that this is the probable best fax number based on the	Text	1

FaxSource and Type when there are multiple fax numbers for the pharmacy.
(New column added 5/20/2024)

* FaxSource and FaxType fields are used to decide which is the "best" fax number to send to (provided that the number is verified). Generally, the FaxSource/FaxType pairs, in order of priority, are: 2/P, 2/M, 1/P, 1/M.

** Data derived algorithmically uses CarePrecise QoRelate™ technology to discover hidden fax numbers, assimilating records from multiple sources using an AI model consisting of "brute-force" and fuzzy logic matching processes, and may contain inaccuracies.
